

Annex XI

**Report of activities of the “Cochlodinium Corresponding Group (CCG)”
for the 2006-2007 biennium**

Report of activities of the “Cochlodinium Corresponding Group (CCG)” for the 2006-2007 biennium

Through CCG activities in the past two years, we have organized *Cochlodinium* Corresponding Group so as to make a set of information on *Cochlodinium* (CCG). In CCG activities, we have conducted a website, which introduces *Cochlodinium*, explanation of the species, and information of its damage to fishery, and so on. And we make a pamphlet of *Cochlodinium*.

In 2006-2007 biennium, CEARAC will add the information of countermeasures against *Cochlodinium* to HAB Database and *Cochlodinium* website based on the collected information through preparation of booklet of countermeasure against red tide. And we would like to make pamphlet of *Cochlodinium* in four languages of each members.

On 13-22 October 2006, PICES 15th Annual Meeting will be held. In this Meeting, CEARAC will introduce the activities of *Cochlodinium* Corresponding Group (CCG).
