

## **NOWPAP/PICES/WESTPAC Joint Training Course on Remote Sensing Data Analysis**

**He yawen**

*(Institute of Geographical Sciences and Natural Resources Research Chinese Academy of Science)*

**Beijing China**

NOWPAP/PICES/WESTPAC Joint Training Course on Remote Sensing Data Analysis was held in Russia on October 8 to 12, 2011, and it was the first time I visited Russia. This was an unforgettable experience for me.

Firstly, the training course was very useful. Currently, I am dedicated to a real-time oil spill monitoring project supported by China Petroleum Limited Corporation. In this project, my major work is to check daily satellite images (MODIS and Radar data) to identify the oil spill spots. Fortunately, this course provided me with more information and knowledge about the oil spill monitoring

Secondly, the training course was held in Vladivostok. It is a beautiful city with a great number of attractions to visit. The city has magnificent old and new buildings, monuments and a lot of other sights to wander around.

The last but not the least is that the staff arranged accommodations and transportation. They were very nice and made me feel comfortable. Everyone at the training course was very kind and caring, and they answered all my questions. The hotel was very clean and it was pleasant to be there."I'd like to thank the staff members and all lecturers for all their hard work.
